Pillar III Disclosures Dec 2014

HSBC Saudi Arabia Limited

Cautionary statement regarding forward looking statements

These Capital and Risk Management Pillar 3 Disclosures as at 31 December 2014 contain certain forward looking statements with respect to the financial condition, results of operations and business of HSBC SA. These forward looking statements represent HSBC SA expectations or beliefs concerning future events and involve known and unknown risks and uncertainty that could cause actual results, performance or events to differ materially from those expressed or implied in such statements.

Forward-looking statements involve inherent risks and uncertainties. Readers are cautioned that a number of factors could cause actual results to differ, in some instances materially, from those anticipated or implied in any forward-looking statement. Forward-looking statements speak only as of the date they are made, and it should not be assumed that they have been reviewed or updated in the light of new information or future events.

Contents

1. Scope & background

HSBC Saudi Arabia Limited (HSBC SA) is a limited liability company, registered in the Kingdom of Saudi Arabia under Commercial Registration No. 1010221555 dated 27/06/1427H (corresponding to 23/07/2006G) and Sagia Licence No. 102030104697 dated 17/12/1426H (corresponding to 17/01/2006G), organized and existing under the laws of Saudi Arabia with its principal place of business previously addressed as P.O. Box 9084, Riyadh 11413, Kingdom of Saudi Arabia and currently changed to 7267 Olaya - Al Murooj, Riyadh 12283-2255, Kingdom of Saudi Arabia (Note: we are in the process of updating our postal address in our constitutional documents).

The main activities of the Company are to provide a full range of investment banking services including investment banking advisory, debt and project finance as well as Shariah compliant finance. It also manages mutual funds and discretionary portfolios. The Company serves a wide range of clients including but not limited to corporates, non-bank financial institutions and individuals.

2. Capital Structure

As at 31 December 2014, the Company is owned by the following shareholders in the proportion set out below:

- *Paid-up Capital*

	Number of shares	% of contribution	As at 31 December 2014	As at 3 31 December 2013
HSBC Asia Holdings BV	4,900	49%	245,000,000	245,000,000
The Saudi British Bank ('SABB')	5,100	51%	255,000,000	255,000,000
Total	10,000	100%	500,000,000	500,000,000

SAR '000

Capital Base	**2014**	**2013**
Tier-1 capital		
Paid-up capital	500,000	500,000
Statutory Reserve	95,523	72,579
Audited retained earnings	173,768	209,275
Total Tier-1 capital	**769,291**	**781,854**
Tier-2 capital		
Revaluation reserves	15,274	13,585
Total Tier-2 capital	**15,274**	**13,585**
Total capital base	**784,565**	**795,439**

- *Statutory Reserve*

In accordance with Article 176 of the Saudi Arabian Regulations for Companies, the Company is required to transfer 10% of net income to a statutory reserve until such reserve equals 50% of the paid up capital as a minimum. This reserve is not available for distribution. The Company has transferred 10% of its net income for the year to statutory reserve.

- *Audited Retained Earnings*

This constitutes undistributed profits relating to prior years as well as profit for the year 2014 net off zakat, income tax and statutory reserves.

- *Revaluation Reserve*

This constitutes changes in fair value compared to average cost on the available for sale investments.

3. Capital Adequacy

HSBC SA has reviewed the capital requirements calculated under Pillar 1 and considers itself well capitalised, infact much beyond the required capital levels. As at 31 Dec 2014, Pillar 1 capital requirement was SAR 313million, whilst total available capital was SAR 785million resulting in a capital ratio of 2.50 times the minimum.

HSBC SA's Internal Capital Adequacy Assessment Process (ICAAP) indicates no additional capital charge needs to be considered for Pillar II.

The company carried out stress testing to determine the adequacy of the capital based on stress tests scenarios. The stress tests results indicate that HSBC SA continues to fulfil the requirements for minimum level of capital in accordance with the Prudential Rules.

In accordance with Annex 9, Section 8 of the Prudential Rules, HSBC SA developed a Medium Term Outlook (MTO-strategic plan) for the years 2014-2016, taking the macroeconomic factors into consideration and how these will affect its business growth. The MTO was approved by the Board which also included the Capital Plan.

The Capital Plan of HSBC SA indicates that the risk profile of the company will remain the same while capital will continue to grow over the MTO period and beyond to 2017 with rising profits and higher statutory reserves. The company's capital ratio remains well above the minimum levels required including the stressed scenarios mentioned above, over the Plan period.

4. Risk Management

The Board of Directors is responsible for the overall risk management approach in HSBC SA and for reviewing its effectiveness.

The Board's designated committee for risk matters is the Board Risk Committee which approves and provides oversight for the Company's risk framework, plans and performance targets which include the establishment of risk appetite statements, risk management strategies, the appointment of senior officers, the delegation of authorities for credit and other risks and the establishment of effective control procedures.

The Chief Risk Officer (CRO) is responsible for managing the Risks within the Company. In addition there is a separate Compliance Head and both of these individuals report directly to the CEO. Their key functions are:

- *Chief Risk Officer*
  - *Risk Management*
  - *Operational Risk*
  - *Security and Fraud Risk*
- *Compliance*
  - *Financial Crime Compliance*
  - *Regulatory Compliance*

The Company's strategy, processes and policies are documented with regular reporting through Key Risk Indicator (KRI's) and Limits and escalation to Management and Governance Committees.

The Company operates a three lines of defence model to manage the risk within the business and monitor the effectiveness of controls.

- *First Line – management responsibility is with the business and control functions for the risks they are managing – supplemented by Business Risk Control Managers.*
- *Second Line – Operational Risk*
- *Third Line – Independent Audit Function.*

Through the ICAAP process the Board reviews the risks of the Company against the Capital availability. On an ongoing basis the risk profile of the Company is reviewed against the Risk Appetite Statement and also the ICAAP exposures to ensure that the risks remain appropriate.

Annual Review of the Effectiveness of Internal Control Procedures

HSBC SA's management is responsible for implementing and reviewing the effectiveness of the Company's internal control framework as approved by the Board of Directors.

HSBC SA has established clear standards that should be met by employees, departments and the Company as a whole. Systems and procedures are in place within HSBC SA to identify any deviations, control and report on major risks including credit, changes in the market prices of financial instruments, liquidity, operational error, breaches of law or regulations, unauthorised activities and fraud. In addition to an on-going management review, exposure to these risks is subject to monitoring through various management committees that were established to ensure the effectiveness of the Company's control framework and to maintain specific oversight of key risks such as credit, operational, compliance and fraud.

Periodically, strategic plans are prepared for key customer and product groups and support functions. These are implemented and monitored through annual operating plans that are prepared and adopted by all business and support functions and that set out the key business initiatives and their likely financial effects.

Centralised functional control is exercised over all computer system developments and operations. Common systems are employed for similar business processes wherever practicable.

In addition, functional management is responsible for setting policies, procedures and standards across all areas of risk, including credit, market, liquidity, operational, IT, accounting, information, legal and regulatory compliance, human resources, reputational and purchasing risks. A detailed exercise to review the policy framework for all key functions has been completed during the year.

The Risk Management function serves as a secondary control maintaining oversight of Credit, Market and Operational risks, as well as other functions such as business continuity, security and fraud risks. The Compliance function maintains oversight of business operations and management action to ensure conformity with regulatory requirements. The risk management process is fully integrated with the strategic planning, annual operating plan and capital planning cycle. Furthermore, each employee is expected to be accountable for and to manage the risk within his or her assigned responsibilities based on the governance principles adopted by the Company and addressed during training programs.

The systems and procedures for the ongoing identification, evaluation and management of the significant risks faced by HSBC SA were in place throughout the year. These procedures enabled HSBC SA to discharge its obligations under the rules and regulations issued by CMA, the Capital Market Authority.

- *Operational Risk*

Operational risk is defined as:

"The risk of loss resulting from inadequate or failed internal processes, people and systems or from external events, including legal risk."

Operational risk is relevant to every aspect of the Company's business and covers a wide spectrum of risks.

It is HSBC SA's strategy to manage operational risks in a cost effective manner, within targeted levels consistent with the company's risk appetite as defined by the RAS.

The company's Operational Risk management framework ensures minimum standards of governance and organization over operational risk and internal control and covers all its businesses and operations.

It should be noted that operational risk categories can be inter-related and operational risk incidents may impact the Company's customers, its regulatory profile and its reputation, as well as resulting in direct impacts.

Strong risk management and internal control are core elements of HSBC SA's strategy and all staff are responsible for managing and mitigating operational risks in their core operations.

Operational Risk has specific responsibilities in relation to the operational risk framework. These are:

- *Set the Operational Risk framework and policy and oversee their implementation across HSBC SA.*
- *Provide quality assurance and challenge of risk and control assessments, internal control monitoring plans, the results of control monitoring activity conducted by the First Line and of the completeness of second line oversight of the business and functions.*
- *Provide independent oversight of HSBC SA's operational risk profile, identify emerging risks and gaps and carry out specific reviews of key risk issues.*
- *Flag breaches of risk appetite and unacceptable delays in resolving control issues to the appropriate governance committees.*

It is recognized that Operational Risk work closely with the BRCM's including a regular weekly meeting to track issues and ensure consistency.

- *Internal Audit*

The Third Line of Defence is Internal Audit which provides independent assurance to management and the Board over the design and operation of HSBC SA's risk management, governance and internal control processes.

Internal Audit is independent of the first and second lines of defence. Even where Internal Audit performs similar testing or monitoring activities to those undertaken by the first or second lines of defence, these are undertaken as part of Internal Audit's independent assurance role and are not to be relied upon by management as a substitute for or supplement to first or second line of defence activities.

Internal Audit assurance is based on a combination of risk management framework audits, business and functional governance audits, themed audits of key existing and emerging risks and project audits to assess major change initiatives.

HSBC SA assesses capital requirement for operational risk based on P&L in accordance with Pillar 1 charge. The Company also carries out stress test based on operational losses and takes the incremental charge where required over and above the Pillar 1 charge. The overall capital charge taken by the Company under Pillar I is SAR 105.4million. In stress scenarios the total capital charge computed is - instantaneous shock scenario SAR 67.5 million and long term shock scenario SAR 151.4 million.

- *Credit Risk*

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Credit exposure within HSBC SA principally is from a fiduciary perspective within the Asset Management Business, Cash with Banks, Investment of the Company's capital, Receivable from customers and on Credit Commitments associated with the Companies brokerage and HSS activities.

The Company attempts to control credit risk by monitoring credit exposures, limit transactions with specific counterparties and continually assessing the creditworthiness of counterparties. The Companies risk management policies are designed to identify and set appropriate risk limits and to monitor the risks and adherence to limits.

The Company's credit exposure as at 31 December 2014, is predominantly in Saudi Arabia, however, one of the local Funds invested in amounting to SAR 26.4million takes exposure in GCC.

The concentration risk arises mainly in company's investments bulk of which is in one mutual fund, however, the underlying risk itself is fairly diversified

Please refer Appendix VI for contractual maturity of the assets of HSBC SA.

HSBC SA defines "past due claims" as amounts that are not repaid by the customers within 60 days.

Any past due claim is classified as impaired when there is objective evidence of credit related impairment as a result of one or more loss events that occurred after the initial recognition of the claim and that a loss event(s) has an impact on the possible recoverability of the full amount of the claim which can be estimated reliably.

A specific provision for impairment is recorded against impaired claims if there is objective evidence that the Company will not be able to collect all amounts due. The amount of the specific provision is the difference between the carrying amount and the estimated recoverable amount.

The Company has limited credit exposure against which no collateral has been taken nor any netting arrangements exist. The company has also not entered into credit derivatives to mitigate this exposure. Considering the nature of credit risk at present there is no wrong-way risk exposure.

HSBC SA had an impairment charge of SAR 394k during year from an entity with holdings in diversified business.

The ageing of past due amounts and industry sector is as follows:

SAR'000

60-180 days	180 - 365 Days	1-2 years	2-3 years	3-4 years	Total
5,714	1,078	-	868	844	8,504

	SAR'000
Banks and Other Financial institutions	3,684
Building and Construction	375
Electricity	4,219
Manufacturing	131
Services	95
	8,504

- *Market Risk*

Market Risk is the risk that the fair value of financial instruments will fluctuate due to changes in market variables such as special commission rates, foreign exchange rates and equity prices. The company classifies exposures to market risk into either trading or non trading books.

The market risk taken by HSBC SA is limited and is operating under approved market risk limits

- *Market Risk Trading Book*

The board has set limits for the acceptable level of risks in managing the trading book. Nominal limits have been established covering the product and the daily and monthly Mark to Market Loss referral limits.

Within the trading limits the Board has authorized Equity Underwriting limits to cover IPO's and Rights issues with nominal limits. The nature of the Saudi Market currently is focused on soft underwriting where the Company is not exposed to Equity Price risk, although certain transactions can have hard underwriting limits where the Company would be exposed.

- *Market Risk Non Trading Book*

The Company has deployed its surplus capital in the Company's Asset Management Funds which provided exposure to Saudi and International Money Market and Fixed Income investments resulting in special commission and FX exposure. These operate under nominal limits approved by the Board including MTM Referral Limits.

- *Liquidity Risk*

Liquidity Risk is the risk that HSBC SA may be unable to meet its liabilities when they fall due, or may only be able to do so at excessive cost. The main source of funds for HSBC SA is its capital and undistributed profits. In the case of HSBC SA liquidity risk may arise by an inability to sell a financial instrument in the market on a timely basis. Given the nature of HSBC SA activities (i.e generally not direct lending) this risk is mitigated via deploying the Companies surplus capital mainly in HSBC SA Mutual Fund which can be liquidated in a few days. Within HSBC SA the main liquidity risk is of a fiduciary basis within Asset Management.

The liquidity reserve of HSBC SA as at 31 Dec 2014 is at SAR 778million. The reserve has been computed as assets that may be converted into cash within 90 days (liquid assets) less current liabilities.

The liquidity ratio computed as liquid assets divided by liabilities works out to 3.13

HSBC SA conducted stress test on liquidity risk given the current HSBA SA Mutual funds structure is around 86 % deposits with banks (as at 31 December 2014) it is recognized that if we sought to redeem most of our capital in stress event the withdrawal could take longer. The following two scenarios were considered for stress testing. The stress test results did not result in a significant capital charge.

Instantaneous Shock	*Maximum 5 day price move in the unit value during previous 2 years,*
Longer Term stress Scenario	*Maximum 90 day price move in the unit value during previous 5 years.*

As evident from the above HSBC SA has a large capital base and with its liquidity management mentioned above provides more than adequate liquidity to its businesses even under stressed conditions.

- *Fiduciary Risk*

The risk to HSBC SA of breaching its fiduciary duties where it acts in a fiduciary capacity as Trustee, Investment Manager as mandated by law or regulation. Within HSBC SA this risk is mainly within the Asset Management business where we are investing in funds on behalf of clients.

The risk within Asset Management is primarily managed by the business, with additional limits and controls established with the individual fund prospectus or client mandate – these limits are independently monitored by Risk.

The fiduciary risk in asset management can arise from market risk, liquidity risk, credit risk, product design and product suitability amongst others. The risk is managed through internal controls exercised primarily through the following committees:

Committee	***Objective***
Investment Committee	*Ensure that investment process followed by HSBC SA complies with the standards required by both CMA regulations and HSBC best practices.*
Performance Review Committee	*Ensure that all the DPMs and Mutual Funds are managed in line with the investment objective and local regulations.*
Product Approval Committee	*Oversee initiatives to develop or distribute new products.*

In addition, a business risk control team is also part of the asset management business that keeps the business head apprised of any emerging risk and / or any issues that need to be addressed.

Control departments including compliance and risk management also oversee the operations of the business with the risk management committee. The risk department in particular monitors the management of all investment funds and portfolios with daily reports generated to identify any breaches against regulatory requirements, client imposed restrictions or Management Action Triggers (MAT) that generally specify the maximum deviation of a portfolio's performance compared to its benchmark.

- *Compliance Risk*

The risk to HSBC SA in breaching Local Regulatory and International Best Standards in regard to Financial Crime Compliance and Regulatory Compliance. Within HSBC SA this risks exists throughout all areas of the Company.

The risks is primarily managed by the business and through an independent compliance function who is responsible for providing guidance and independent control and review of the compliance risks within the company.

Summary of HSBC SA's Governance and Control Infrastructure for Compliance Risk.

- *Compliance Conduct Unit acts as the centralized unit and gatekeeper for all "Regulatory Communication" to coordinate the correspondences with all regulators and establish a nucleus for contact with CMA and TADAWUL.*
- *In 2014, in line with the CMA APR Regulation Article 58, HSBC SA Compliance Committee (ICC) was formed which reports to the Audit Committee.*
- *Compliance issues are escalated to and discussed at the monthly HSBC SA Risk Management Committee (RMC) and ICC meeting and quarterly in AUCOM.*
- *The Compliance Department was restructured and rebranded as the Financial Crime Compliance and Regulatory Compliance (FCC & RC). The new structure include four separate units :*
  - *The Advisory Unit: Responsible to enforce the Compliance and AML policies*
  - *The Monitoring Unit: Responsible to implement the compliance annual review plan to assess against the compliance policies and procedures.*
  - *The Anti-Money Laundering and Sanction unit established to manage AML & Sanction risks*
  - *Compliance Conduct Unit: Responsible for the FCC & RC policies,*

HSBC SA has implemented a strong internal control structure to ensure full compliance with all directives issued by CMA. Frequent reviews are conducted and business owners certify on an annual basis their compliance with existing directives

- *Other Risks*

HSBC SA continues identifying risks that will adversely impact on present and future operations of the Company. Issues are addressed in a proactive manner with respect to risk assessment and management to ensure compliance with local regulatory requirements.
